

# Kinetis® KE06–48 MHz, Mainstream with CAN Microcontrollers (MCUs) based on Arm® Cortex®–M0+ Core

## KE06

Last Updated: Apr 4, 2024

The Kinetis® KE06 MCU family delivers a next-generation solution with enhanced ESD/EMC performance for cost-sensitive, high-reliability device applications used in high electrical noise environments.

- Offers a cost-effective, entry-level 32-bit solution featuring low power and high robustness
- Provides a pin-compatibility within the Kinetis E series portfolio, as well as pin compatibility with Our 8-bit S08P family
- Includes a powerful array of analog, communication and timing, and control peripherals with varying flash memory size and pin count
